Essential Stats

Volleyball

The **FREE** app **Android** for those who want to make their first simple steps into the scout and statistics world.

Essential Stats is:

Easy - With just one tap at the end of the rally, you can get a synthetic statistical analysis of great value.

For mobile devices - You just need a smartphone or a tablet to start scouting from the bench.

Compatible - With other Data Project scout software: you can export data on Click&Scout or Data Volley 4 or import a scout from them.

Sharing - You can share with your team the information collected thanks to the PDF match report and Facebook share button.

- **Scout a match:** with a tap you register the result of every rally, to have at the end scores analysis per set and per rotation.

- **You can do more:** relate the player to the rally result and get also scores analysis per player; scout the start of the rally, in order to synchronize the file to the video of the match.

- **Match analysis:** at the end of the match, you get the analysis per set, per rotation and, if detected, of players. To read the analysis you just need to know 3 symbols: # indicates kills, = indicates errors, / indicates attacks blocked.

- **Export and share:** Essential Stats generates 3 types of files. 1. File scout standard Data Project, export it on Data Volley 4 or Click&Scout. 2. PDF: print the match report or share it with the team straight from your device via Whatsapp, email or any other tool that supports it.

3. Analysis file of players, sets or rotations, created for sharing on Facebook.

- **Download:** the app is available for free on Google Play Store and Amazon Appstore.
