LiteScore

Take the score with you, anywhere and anytime

LiteScore is the new complete and interactive system used to display scores and flag events. LiteScore is a portable two faced led scoreboard that can be used at all levels and can display scores during matches or during training.

LiteScore is:

Interactive - Connected to e-Scoresheet, the electronic report used by FIBV, CEV and many League and Federations worldwide, it automatically displays the official score, the winning sets, the number of time outs and substitutions requested.

Versatile - You can control events by any android device with Bluetooth. LiteScore can also be used during training for technical needs, for example to display the score during specific situations, recall player's attention, and much more. Also ideal for sports such as Beach Volleyball, Basketball, Handball, Futsal.

Portable - Compact and light, it can easily be carried and positioned anywhere you want (52x20x20cm, weight 5Kg)

- The information during the match:

Score: from 0 to 199, so it can be used also for other sports. Serve: A light bar below the score indicates the serving team at the moment. On request, you can see the number of the serving player. Sets won: indicated by 3 LEDs. Timeout: two LED next to the score, that flashes for 30 or 60 seconds, depending on the type of selected time out. Substitutions: from 0 to 19. During the Beach Volleyball matches, these numbers show the serving player. Two specific buttons can be connected to LiteScore to call time outs or substitutions from each bench and the sound can be heard through the integrated speakers.

- Integration with e-Scoresheet:

LiteScore was designed to display and manage specific data on an official scoreboard connected to e-Scoresheet, the software for the electronic official report used by FIVB, CEV and many Leagues and Federations worldwide. Many LiteScore can be connected to one e-Scoresheet, to

handle major events.

- **LiteScore Manager** is the software to manage and manually control LiteScore from any Windows computer. It also allows you to connect with Data Volley, to receive the score directly from the statistical software.

- **The remote control**: the Bluetooth connection lets you control the LiteScore from many Android devices, with all the features and demands of an official scoreboard. The app is very useful in training sessions.

- **During training**: All features used during official matches can be used during training sessions providing a technical solution for the coach's needs. For example: the 3 leds for the sets, light up in sequence, and can be used for specific drills such as "wash drills"; the two types of time outs are used as timers for drills of 30" or 60"; the siren is an excellent way of attracting player's attention; the leds that show ball possession indicate where the

ball is coming from.

- **Customizable timer**: The Android app lets you create different temporal events associated with each drill, and it will set time of work and rest, amount of rounds, number of audible warnings for the beginning and the end of the drill. The application can handle even the friendly matches independently.

E-SCORESHEET

The electronic report officially used by FIVB, CEV and many League and Federations

CLICK&SCOUT

The new frontier in the scouting world for tablet Android, iOS; Windows and Mac OS

DATA VOLLEY 4

The software for volleyball statistic scouting used worldwide
