# VolleyBoard

## Manage multimedia Volleyball events

Volleyboard is the software for managing your Volleyball event on the big screen of the venue. It allows sponsors and audience to be part of the match, with statistics, commercials, music, video, replay and much more...

### VolleyBoard is:

**Score of the match** - Display score and individual or teams statistic in real time. Audience can increase their technical knowledge and opinion about the performance of the players. They will almost think they are part of the technical staff!

**Sponsors involvement** - Promo videos or advertisements can be showed during time outs or at the end of each set. Partner's logos can be displayed during the whole match.

**Live Emotions** - Spectators can see highlight and replays on the big display thanks to TV broadcast signal and they can also interact with the popular Kiss cam or Bongo cam. Augmented Reality applications are in development.

- **Official FIVB Scoreboard:** When it's connected with e-Scoresheet, Volleyboard shows real-time scoring and all that is required of a official scoreboard, with personal customization (logos, sponsors, etc.). You can involve supporters with huge team presentation before the match and with a visual lineup, showing the starting six. If there are no e-scoresheet and Data Volley, it can be used manually, keeping all of its features.

- **Fully customizable:** Improve the service for the spectators. Use your team colors, choose which statistics you want to show, change the language and the background. Advanced options are available to manage automatic actions during the end of each rally, time outs and the end of sets.

- **Full screen statistics:** During timeouts or the end of sets it shows the statistics of the match or the team statistics. Volleyboard can also show on the display of the venue, at the end of each rally, the points of the players who scored. All data comes in

real time from a connected Data Volley.

- **Manage advertising spaces:** Your sponsor will always be present in Volleyboard. Audience will be able to see the score on the scoreboard but also the logos of the sponsors allowing you to suggest customized offers reducing printing costs. A user friendly interface allows you to manage your media files and display them on the big screen. Fixed or rotating banners are placed on the bottom of the screen. Specific buttons will allow you to interact with the spectators, displaying full screen advertisements, logos and other useful information from your commercial partners during time outs, or in-between sets. Length of the advertising is totally customizable, according to the sponsor agreements.

- **Video In Connection:** Connect to the video signal of the local television broadcast and show highlights, frame benches, players, audience, and much more, like the Kiss Cam and Cam Bongo,

where the audience becomes part of the event! Customize your Kiss or Bongo mask as you like, adding your personal touch.

- **Video Check Connection:** Specific rallies can be replayed in slow motion by connecting Volleyboard to Video Check, the high speed multicamera video recording system. Audience will see the decisions taken for doubtful balls.

- **Web Page:** Show live results from the web. Enable this feature to see on the big screen a specific website, i.e. to know all the results of a championship.
